Treatment space
The ergonomic design of the units allows both the dentist and the assistant to work comfortably in a natural posture, and granting easy access to a patient.

Headrest with 3D ball joint
Stainless steel headrest with 3D ball joint enabling 3-axis positioning for an unparalleled comfort even during complex dental treatments.

Tilting armrest
Tilting armrest on the right side and fixed armrest on the left side not only grant additional comfort to your patients, but also improve working comfort and ergonomics even during long treatment sessions.

Bien Air electric MC3 Micro Motor
MC3 micromotors offer impressive performance. They are quite simply the most efficient brush micromotor. With vibration-free operation from 20 to 40,000 rpm, their great versatility sets them apart. An outstanding motor, now also available with an intensity-adjustable LED light.

Optional choice of EMS, Mectron or Satlec scaler
The compact electronics of DIPLOMAT units allows handpiece arrangement according to personal preferences. Models can be equipped with wide range of micromotors and turbines, curing light Mectron Starlight and EMS or Satelec scaler.

Optional upgrade to LED light
Both units can be equipped with Xenos LED light with sensor and control function from the light. Diplomat Xenos shadowless LED-Light is specifically designed for modern dentistry. Xenos – LED provides soft and neutral daylight illumination at color temperature from 3700-4000K and has extremely long operation life.
